034 The Operators Loop

Perspective Fieldbook · https://kb.jeffreysummers.com/docs/034-the-operators-loop-2/

The Demand

Tomorrow, notice which loop you're actually running — the Compounding Loop of Road 2 or the Contraction Loop of Road 1 — in the first decision you make on the floor. You choose between the two loops every single shift, whether you name the choice or not. Name it this time.

The Work

Notice which loop you actually ran in the first decision you made on the floor today:
The decision:
☐ Compounding Loop — I built a current read, ran it, named the decision, gated it, acted, and read the result
☐ Contraction Loop — I read from the dashboard, acted on the first fix, and never went back to check
Which loop is currently running by default in your operation, most days?
The first decision tomorrow where you will name which loop you're choosing, before you make it:
